

Abdalaziz Khairi

Production Manager/Radiochemist | London, UK | (+44) 07588291827 | abdazizkhairi@hotmail.com

Profile

Experienced Production Manager and Radiochemist with a diverse background in pharmacy, quality assurance, bioconjugation techniques, and radiopharmaceutical development. Proven leader in GMP-compliant radiopharmaceutical production with expertise in method development and optimization for complex chemical synthesis and analysis using HPLC, GC, TLC, and spectroscopy techniques. Demonstrated track record in leading cross-functional teams, developing analytical protocols, optimizing production processes, and managing regulatory compliance. Recently completed MSc research on novel antibody-drug conjugates for cancer therapy, complementing strong industrial experience in production management, GMP compliance, quality control, and technical documentation.

Skills & Abilities

- **Production Management & Leadership**
- **GMP/GDP/GCP/GLP Expertise**
- **Radiopharmaceutical Development & Manufacturing**
- **Analytical Techniques** (HPLC, GC, TLC, UV/Vis Spectroscopy)
- **Radiopharmaceuticals Quality Control**
- **Project Management & Team Leadership**
- **Conjugation Chemistry** (Radiochemical labeling, Bioconjugation methods)
- **Regulatory Compliance & Documentation**
- **Training Development & Implementation**

Experience

Production Manager

Curium Pharma Ltd. | London | 07/2025 -- CURRENT

- **Production Leadership:** Lead and manage the radiopharmacy production team, overseeing daily operations and ensuring optimal resource allocation for continuous radiopharmaceutical supply.
- **Strategic Planning & Implementation:** Develop and implement production strategies for new PET radiotracers and radiopharmaceuticals, ensuring compliance with GMP standards and regulatory requirements.
- **Regulatory Compliance:** Serve as named Production Manager on MHRA Specials License, maintaining responsibility for all production activities and regulatory compliance.

- **Team Management & Development:** Direct and supervise production staff, conduct performance evaluations, and lead comprehensive training programs for new radiopharmaceutical products and processes.
- **Cross-functional Leadership:** Lead multidisciplinary project teams in the introduction of new radiopharmaceuticals, managing material requirements and optimizing supply chain processes.
- **Quality Systems Management:** Oversee deviation investigations, conduct root cause analysis, and implement Corrective and Preventive Actions (CAPA) to drive process improvements and compliance enhancements.
- **Operational Excellence:** Manage and optimize radiochemical synthesis and dispensing processes using advanced equipment including Trasis AllinOne (AiO) radiochemistry synthesizer, HPLC, and automated filling units.

Radiopharmacy Technician

Curium Pharma Ltd. | London | 08/2022 -- 07/2025

- **Method Development:** Led the development and implementation of production methods for new PET radiotracers (Gallium-68), ensuring compliance with GMP standards and regulatory requirements.
- **Quality Control Management:** Managed quality control procedures, analyzing radionuclide and radiochemical purity using advanced techniques (HPLC, GC, TLC, Gamma Spectrometry), ensuring adherence to established standards and protocols.
- **Process Optimization:** Oversaw and optimized radiochemical synthesis and dispensing processes using Trasis AllinOne (AiO) radiochemistry synthesizer, HPLC, and automated filling units.
- **Documentation & Compliance:** Developed and implemented Standard Operating Procedures (SOPs) for new products and processes, contributing to the continuous improvement of the Pharmaceutical Quality System.
- **Training & Knowledge Transfer:** Created and conducted comprehensive training modules for new radiopharmaceutical products and processes, facilitating knowledge transfer within the team.
- **Change Control Management:** Initiated and managed Change Controls, driving operational efficiencies and maintaining GMP compliance.
- **Clean Room Operations:** Maintained clean room integrity through strategic planning of sanitation processes, consumable transfers, and isolator cleaning protocols.
- **External Collaboration:** Collaborated with external experts and led meetings to enhance product development and process optimization.

Quality Assurance Officer

Porton Biopharma Ltd. | Salisbury | 08/2021 -- 08/2022

- Performed review and approval of key documents including batch manufacturing records, validation protocols, SOPs, change controls, risk assessments, Non-Conformances, and Customer Complaints.

- Participated in data gathering/review for quarterly trending reports and annual Product Quality Reviews (PQR) for related stages of manufacture.
- Facilitated and reviewed structured investigations, maintaining above 95% compliance by completing all reports in a timely manner.

Aseptic Compounder / Technical Assistant

ITH Pharma | London | 03/2020 -- 06/2021

- Prepared aseptic unit equipment and supplies for compounding of Parenteral Nutrition, Chemotherapy, and CIVAS products.
- Measured and mixed products using correct apparatus according to worksheets, ensuring accuracy and safety.
- Completed documentation in line with company policies and procedures.

Hospital Pharmacist

Royal Care International Hospital | Khartoum | 01/2017 -- 08/2017

- Provided information and advice regarding drug interactions, side effects, dosage and medication storage.
- Collaborated with healthcare professionals to plan, monitor, and review patient treatment plans.
- Verified safety and accuracy of physician orders, maintaining high quality of practice.

Hospital Pharmacist / Stock Manager

Radiation and Isotopes Oncology Hospital | Khartoum | 09/2014 -- 11/2016

- Directed and supervised employees engaged in inventory management and stock control.
- Provided customer service and responded to inquiries and complaints.
- Prepared and reviewed inventory and sales records, ensuring accurate documentation.
- Processed medication orders under pharmacy director supervision.

Education

MSc. Analytical Chemistry • October 2024

Birkbeck, University of London | Grade: Distinction

Thesis: Precursor-Directed Biosynthesis of Novel Azinomycin Analogues for Antibody-Drug Conjugates.

Key Focus Areas: Bioconjugation techniques (CuAAC), Protein modification, Chromatographic analysis (HPLC, SEC), Spectroscopy.

BSc. Pharmacy • July 2014

University of Medical Science and Technology | Grade: 2:1 (Upper 2nd Class)

Thesis: Study of The Quality of Life of Female Breast Cancer Patients on Hormonal Therapy attending the Radiation and Isotopes Centre Khartoum (RICK).

Relevant Technical Expertise

Production Management: Extensive experience in leading radiopharmacy production teams, managing resources, and ensuring optimal operational efficiency.

Analytical Method Development: Expert in designing and optimizing analytical protocols for complex chemical analysis and radiopharmaceutical characterization.

Chromatography Techniques: Advanced proficiency with HPLC, GC, TLC for sample separation, purification, and characterization.

Spectroscopic Methods: Skilled in UV/Vis spectroscopy, gamma spectrometry, and radiation detection techniques.

Documentation & Compliance: Expert in GMP documentation, validation protocols, regulatory requirements, and MHRA compliance.

Data Analysis: Advanced skills in interpretation of analytical data, statistical analysis, and technical troubleshooting.

Training & Development: Proven ability to design and deliver comprehensive training programs for technical and non-technical staff.
